DETAILED ACTION

[1] This action is responsive to Applicant's remarks/amendment filed on 02 March 2007 with regard to the advisory Office Action mailed on 19 January 2007.

Status of Claims

[2] Claims 1-29 are pending.

Election/Restrictions

DETAILED ACTION

Election/Restrictions

[3] Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-17 and 25-29, drawn to a welding stud, classified in class 411.
- II. Claims 18-24, drawn to a method of manufacturing, classified in class 470.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make another and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the product can be made from casting instead of stamping or etching, and the process can be used for making products other than a weld stud, such as a set-screw.

Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.

A telephone call was made to Tim Ziolkowski on 07 May 2007 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
